COMPATIBILITY

The following tank mixes have been tested for physical compatibility with ALTO ELITE at recommended rates of use and will mix in the sprayer tank. No tests have been undertaken on crop safety or product performance therefore, use is at the user's own risk. Syngenta Crop Protection will support the physical compatibility of 2 or 3-way tank mixes of ALTO ELITE with any of the fungicides, herbicides, PGRs or insecticides listed. For further information on compatibilities, contact Syngenta Crop Protection on 0800 1696058.

NOTES

Before using any tank mixture, consult and comply with the recommendations of the partner products. Each product should be added separately to the bulk of the water in the spray tank and thoroughly mixed before adding the next chemical. Always use constant agitation of the sprayer tank during mixing, transportation and application. Spray immediately.

Do not include UNIX or RADIUS in a tank mix with Cerone, Satellite, Terpal or Upgrade.

1. Always add RADIUS or UNIX to the spray tank first. Always refer to the Syngenta mixing recommendation when using RADIUS or UNIX alone or in tank-mix with other products.
2. Always add HALLMARK with ZEON TECHNOLOGY to the spray tank last.
3. ALTO ELITE + Rovral Flo is compatible and Syngenta will support its use in the field bean crop.
4. Ally Max SX = can read across to all DuPont SU's.

Use plant protection products safely. Always read the label and product information before use.
