**COMPATIBILITY**

The following tank mixes have been tested for physical compatibility with APHOX at recommended rates of use and will mix in the sprayer tank. No tests have been undertaken on crop safety or product performance, therefore use is at the user's own risk. Syngenta Crop Protection will support 2 or 3-way tank mixes of APHOX with any of the fungicides, herbicides, insecticides or PGR's listed. For further information on compatibilities, contact Syngenta Crop Protection on 0800 169 6058.

\*Always test first as some powdered manganese sulphates are physically incompatible. APHOX is PHYSICALLY INCOMPATIBLE with most formulations of magnesium sulphate, cobalt liquid and Bittersalz.

\*\*All Nutrel trace elements are supported/tested by Nutrel. APHOX is PHYSICALLY INCOMPATIBLE with Goltix WG and Goltix Flo.

**NOTES**

<sup>1</sup> When mixing RADIUS or UNIX always add to the sprayer tank first. Always refer to the Syngenta mixing recommendation when used RADIUS or UNIX alone or in tank mix with other products.

<sup>2</sup> When mixing HALLMARK with ZEON TECHNOLOGY add to the sprayer tank last.

<sup>3</sup> Ally Max SX = can read across to all DuPont SUs.

The user should ensure that all products to be tank mixed with APHOX are approved for use on the crops which are to be sprayed.

Always refer to other manufacturers product information when mixing to ensure correct product use.

Always use constant agitation of the sprayer tank during mixing, transportation and application.

**Always read the label. Use pesticides safely.**
