

SEED TREATMENT

A flowable concentrate formulation containing 25 g/l fludioxonil (a phenyl pyrrole fungicide) and 25 g/l flutriafol (a triazole fungicide) for use on wheat, barley and oats.
 Maximum application rate: 2.0 litres product/tonne seed
 Maximum no. of applications: One per batch

SECTION	PROFILE
1. WILDLIFE	BERET MULTI is not classified as 'Harmful to game, wild birds and animals'.
MAMMALS AND BIRDS	No risk management is necessary to protect wild mammals and birds. BERET MULTI is of low toxicity to both mammals and birds. The risk to wild mammals and birds feeding on treated areas is low due to the limited amount of residues likely to be consumed.
2. BEES	No risk management is necessary as risk of exposure to bees from seed treatment use is low.
3. NON-TARGET INSECTS AND OTHER ARTHROPODS	No risk management is necessary. BERET MULTI poses a low risk to a range of arthropod species commonly found in and around treated fields.
4. AQUATIC LIFE	BERET MULTI is classified as 'Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment'. BERET MULTI is of high toxicity to fish and aquatic vertebrates and moderate toxicity to algae. Care must be taken to ensure that surface waters or ditches are not contaminated with the product or the used container. No risk management is necessary. When used according to the label instructions the risk to aquatic life is low. Not categorised under the LERAP scheme.
5. SOIL AND GROUNDWATER	Fludioxonil is strongly bound to the soil and is not considered to be mobile. Flutriafol is very persistent in soils and although moderately mobile, the risk of groundwater contamination is considered to be low. Use of BERET MULTI according to the label instructions presents a low risk to groundwater.
EARTHWORMS	No risk management is necessary. BERET MULTI is of low toxicity to earthworms.
SOIL MICRO-ORGANISMS	No risk management is necessary. BERET MULTI does not have any significant effects on soil microbial activity.
6. NON-TARGET PLANTS	BERET MULTI is applied as a seed treatment, so the impact on non-target plants is expected to be minimal.

S E E D T R E A T M E N T**ALWAYS READ THE LABEL: USE PESTICIDES SAFELY**

Care must be taken to minimise the risk of surface water contamination from farmyard and field sources.
